Displacement: 2,9 ton

EUROSHIP Services has designed a range of boats with a classic allure. The boats are clinker steel built, complete with a thick jugged out keelson and various other details make the boat a picture to behold.

The designs are timeless, they are elegant and remain graceful and this after ten years or even after a hundred years. A steel boat after all outlasts a human life, there are still steel boats sailing the waters which were built around 1900.it's all possible!
