

Euroship steelboats

Floating Cottage

This boat is the newest product of Euroship Services, designed for anglers, fans of nature and waters.

The floating cottage is a boat with good navigational skills. The base of the boat is a steel catamaran hull which contains the necessary tanks. The superstructure is a 3*4m wood house (cottage) in which you can find: - a double bed, - kitchen furniture with storage, -Gas fridge, gas cooker with 4 burner, -separate small toilet room with chemical toilet, -sofa for two, it can be unfolded into a bed, -so this cottage offers beds for four persons. -plug for 24 volt charger, battery light and oil light

The floating cottage has an outboard engine, we propose to use 10HP engine on waters of low current and 20HP on higher current.

Anyone can built this boat who has some basic hand skills.

We deliver floating cottages either in assemble kit (it contains only the hull parts), or in welded hull or in turnkey version.

We are keen to deliver this type of boat in other (bigger or smaller) size for client's order.

parameters of this boat:

length: 7m, beam: 3,50m, draft: 0,5m,
proposed propulsion: 10-40Hp outboard engine
or electric drive,
hydraulic steering gear, 3*4m wood cottage
6 passengers, 4 beds

The floating cottage design can be modified according to your demands.
We can deliver this boat in any reasonable size!
