Beam over all: 4,85 mtr.
Draft: 1,00 mtr. can be customized
Airdraft: 3,2 mtr can be customized
Displacement: 50 ton

A converted Luxe Motor, a real Dutch barge, the ideal boat for extended periods of living aboard, long trips on the European inland waterways like barging in Belgium, and for making dreams come true, like overwintering in the South of France.

The original barges have nearly all gone and new-build is once again becoming popular. Using original old barge line plans and modern computer technology we have redesigned these types of barges, with modified depth and sheer to make sailing and living aboard a real pleasure.
